NAVEEN KALAKATA

Java Backend Engineer | Spring Boot | Microservices | Kafka | AWS

Frisco, TX | Open to Relocation | +1 (702) 296-6824 | naveenhy567@gmail.com | linkedin.com/in/naveen-kalakata

SUMMARY

Java backend engineer with 4+ years of experience building and supporting high-availability APIs, microservices, and messaging workflows in banking and enterprise systems. Strong in Java 17, Spring Boot, Kafka/JMS, Oracle, AWS, Docker, Jenkins, and SQL tuning. Reduced Bank of America ECM API latency 87%, from 5 seconds to under 660 milliseconds, by optimizing MyBatis and Oracle queries. STEM OPT through 2027; H-1B eligible.

CORE SKILLS

Backend: Java 17, Spring Boot, Spring MVC, Microservices, REST APIs, Kafka, JMS, SOAP/WSDL, MyBatis, Hibernate

Data: Oracle, MySQL, MongoDB, Cassandra, SQL optimization, JUnit, Postman

Cloud/Tools: AWS (EC2, S3, RDS, IAM), Docker, Kubernetes, Jenkins, Git, Splunk, Linux, Agile/Scrum

PROFESSIONAL EXPERIENCE

Bank of America (via Randstad Digital) | Java Developer | Jan 2025 - Present

- Built and maintained Java/Spring MVC backend applications for Equity Capital Markets deal execution workflows.
- Integrated WSDL/SOAP services and JMS queues with Ipreo and Dealogic for Bookbuild and Deal Linking workflows.
- Reduced Masterbook API latency 87%, from 5 seconds to under 660 milliseconds, by tuning MyBatis XML queries and Oracle access patterns.
- Monitored live production issues in Splunk, performed root cause analysis, and supported high-availability deal operations.
- Managed Venafi certificate lifecycle tasks and production support work to maintain platform reliability.

Tech Club Inc | Java Developer Intern | Jul 2024 - Nov 2024

- Developed Java 17 and Spring Boot REST APIs and microservices that improved backend modularity and reduced service coupling.
- Used records and sealed classes to simplify API contracts and domain models for CRUD workflows.
- Containerized services with Docker, reducing environment drift across development and staging.
- Built Jenkins CI/CD pipelines, added JUnit coverage, and contributed through code reviews and Agile sprint delivery.

Cognizant | Java Developer | Jan 2021 - Jul 2022

- Developed backend features for SAP Commerce (Hybris) using Java, Spring MVC, Maven, and MySQL.
- Customized catalog, order, and inventory workflows for client-specific e-commerce requirements.
- Optimized MySQL queries and resolved order placement failures during Tier-3 production support.
- Partnered with cross-functional teams to fix backend issues and improve platform stability during peak traffic.

PROJECTS

E-commerce Web Application | Python, Flask, AWS

- Deployed a full-stack e-commerce application on AWS using EC2, RDS, S3, SES, and VPC components.
- Built storefront, cart, and checkout workflows with Flask, JavaScript, Bootstrap, and responsive UI patterns.
- Applied IAM roles and security groups to enforce least-privilege access in a production-style environment.

Book E-Shopping | Java, Spring Boot, MySQL

- Built an online bookstore with registration, JWT authentication, rental and purchase flows, and admin inventory management.
- Developed end-to-end backend and server-rendered workflows using Spring Boot, JSP, and MySQL.

EDUCATION

University of Central Missouri | Master of Science in Computer Science | Aug 2022 - May 2024

CGPA: 3.4

Amrita Vishwa Vidyapeetham | Bachelor of Technology in Computer Science | Jul 2017 - May 2021

CERTIFICATIONS

AWS Academy Cloud Foundations (2023) | AWS Academy Cloud Architecting (2023) | Oracle Java Explorer (2022) | Git from Scratch, LinkedIn Learning (2022)
